

Table of Contents: Volume 2, 1992

Number 1

Editorial	<i>Y.C. Ho</i>	5
The Brownian Approximation for Rate-Control Throttles and the B/G/1/C Queue	<i>Arthur W. Berger and Ward Whitt</i>	7
Ordinal Optimization of DEDS	<i>Y.C. Ho, R.S. Sreenivas, and P. Vakil</i>	61
Contributing Authors		89

Number 2

Optimizing Discrete Event Dynamic Systems via the Gradient Surface Method	<i>Y.C. Ho, Leyuan Shi, Liyi Dai, Wei-bo Gong</i>	99
Augmented Infinitesimal Perturbation Analysis: An Alternate Explanation	<i>Alexei A. Gaivoronski, Leyuan Y. Shi and Ramavarapu S. Sreenivas</i>	121
A Graph-Theoretic Optimal Control Problem for Terminating Discrete Event Processes	<i>Raja Sengupta and Stéphane Lafortune</i>	139
Contributing Authors		173

Numbers 3/4

Protocol Design for an Automated Highway System	<i>Ann Hsu, Farokh Eskafi, Sonia Sachs, and Pravin Varaiya</i>	183
Tandem Queues with General Blocking: A Unified Model and Comparison Results	<i>Dinah W. Cheng and David D. Yao</i>	207
Asymptotic Continuous Petri Nets	<i>Jean Le Bail, Hassane Alla, and René David</i>	235
Locked Discrete Event Systems: How to Model and How to Unlock	<i>Rein Smedinga</i>	265
Contributing Authors		299
